## Projects

### Kreamin Studio - Online Flea market website

*BCIT Academic Project*

<https://comp4537-front-end.herokuapp.com/>

- Developed with one other partner.
- Efficient global state management using Redux Thunk.
- Utilized Chakra UI to enhance pure CSS.
- Designed the UI/UX, maintained version control.
- Deployment via Heroku on both Frontend and Backend

### Resumaker – Online Resume making website

*Personal Project*

<https://www.resumaker.io/>

- Designed UI / UX
- Integrated Typescript to maximize memory, and code efficiency.
- Integrated Redux Saga for easier asynchronous logic tests on actions.
- Focused on concepts of Typescript in React components, and nested CSS Flexbox.
- Used SCSS for global CSS variables and media queries for responsive pages.

## Experience

### Front End Developer

Jan 2021 – Apr 2021

Love your Planet (Practicum client)

- Implemented fixes after debugging completed code based on prior system.
- Redesigned UI/UX components of the website.
- Implemented fully functional social media platform using *React.js*, *Node.js*, *Redux Thunk*, and *MongoDB*

## Education

### British Columbia Institute of Technology

Burnaby, Canada

Sept 2019 – June 2021

#### Diploma
