Skills

Proficient: Javascript, React.js, React Native, State management, AWS Cloud Services,

Experienced: Knex.js, MongoDB, DynamoDB, Realm.js

Workflow: Asana, Git, Agile Development, AWS Code Commit, Moqups

Experiences

Builtspace Technology Corp. — *Full-stack developer*

January 2022 - Present

- Developed and maintained a hybrid application for prominent construction, HVAC, building owners, and private institutions managing over 50k assets in 20-30 different buildings and over 2 million inspections done with extreme performance.
- Implemented new features such as in-built file system, notifications system, user access level hierarchy, document record history and sharing.
- Implemented custom layers for reusing handlers such as database connection, and consistent response body

   Stack: *React.js, React Native, MUI V5, Redux, AWS Cloud Services (S3, DynamoDB, Lambda, API Gateway, Code Commit, Cloud Watch), Microsoft Sharepoint, Moqup*s

Projects

Tyra — *Fully Functional Kanban board*

Project URL: https://tyra.up.railway.app/   Repository URL: https://github.com/gyminii/tyra/tree/master

- Utilizes GraphqQL for seamless retrieval and manipulation of object models, enhancing flexibility in data management
- Achieved exceptional UX by implementing optimistic UI updates, ensuring smooth and responsive user interactions.

   Stack: *React.js, MUI V5, Redux Toolkit, GraphQL, MongoDB, Railway*

Porfolio — *Personal website*

Project URL: https://gyminii.github.io/   Repository URL: https://github.com/gyminii/gyminii.github.io

- Personal portfolio website showcasing professional projects, skills, and achievements
- Leveraged vanilla Javascript to integrate dark mode, scroll-down animation, and email submission capability.

   Stack: *HTML, CSS, JAVASCRIPT*

Education

BCIT — *Computer Systems Technology Diploma*

September 2019 - May 2021 - Burnaby, Canada
